

# WP7. Dissemination, training and network

**A Systems Approach Framework  
for Coastal Research and Management  
in the Baltic**

# Task 7.1 Dissemination

## **Aim**

- Dissemination of project progress and results
- Awareness raising about coastal problems and ICM challenges
- Promotion of SAF as possible solution

## **Target group**

- Scientists
- Endusers, authorities
- Funding organizations
- broader public

## **Via**

- European EUCC network and in national and international newsletters
- photo competition in at least 5 countries, with public exhibition
- Movies document problems, fieldwork and stakeholder involvement
- Comic strip demonstrates the SAF application steps and results
- Publications in popular science magazine (Coastal & Marine)

## Entry into EUCC database

The screenshot shows the EUCC-D website interface. The background is a light blue sky with tall grass. The EUCC-D logo is in the top left. A teal navigation bar contains links: Startseite, Organisation, Mitgliedschaft, Aktivitäten, Angebote & Service (highlighted), and Kontakt. In the top right, there are links for Deutsch, English, and a search icon. Below the navigation bar, a breadcrumb trail reads: STARTSEITE > ANGEBOTE & SERVICE > INFORMATIONEN-SAMMLUNGEN > PROJEKTE & FALLSTUDIEN. On the left, a sidebar menu lists various resources under 'Küsten Newsletter' and 'Informations-sammlungen'. The main content area displays the details for the 'BaltCoast' project, including its type, duration, and a detailed description of its interdisciplinary approach to coastal management.

### BaltCoast: A Systems Approach Framework for Coastal Research and Management in the Baltic

**Typ des Eintrags:** Projekt  
**Dauer:** 01/04/2015 - 31/03/2018

**Beschreibung:** The Baltic Sea is one of the most intensely exploited seas of the world. A balance between exploitation and protection on the basis of scientific expertise is needed to enable a sustainable use without the destruction of valuable system services. This is the area of conflict where the BaltCoast project and its interdisciplinary system approach is settled. It aims at creating user-friendly methods and tools of practical relevance which allow a systematic input of scientific findings and political processes into the complex management of coastal zones. New problems, challenges and activities in the coastal zone shall be dealt with in a more interdisciplinary way than before. This system approach will be tested in different regions concerning various topics and processes relevant for management. All case studies will run through the complete system approach in order to test and further develop its suitability as a tool for the implementation of national and international coastal and marine policy. The German case study will be positioned at the Oder Lagoon and will deal with the establishment of mussel farms for an improvement of water transparency as well as the fixation and recovery of nutrients.

This is coordinated by the Leibniz Institute for Baltic Sea Research Warnemünde (Prof. Dr. Gerald

## Short article in EUCC newsletter

The screenshot displays the EUCC-D website with a background image of tall grass. The top navigation bar includes links for Deutsch, English, and a search icon. Below this is a teal menu bar with links to Startseite, Organisation, Mitgliedschaft, Aktivitäten, Angebote & Service (highlighted), and Kontakt. The left sidebar contains a list of links under the EUCC-D logo, including Küsten Newsletter, Wettbewerbe, Kurzfilme, Ausstellungen, Zeitschriften, Netzwerke, Informations-sammlungen, and Projekte & Fallstudien. The main content area features a breadcrumb trail: STARTSEITE > ANGEBOTE & SERVICE > KÜSTEN NEWSLETTER > KÜSTEN NEWSLETTER MELDUNG. The article title is 'BONUS: sustainable ecosystem services projects starting', dated 01.04.2015. The text describes eight research projects funded by BONUS, aimed at sustaining the Baltic Sea ecosystem. A second paragraph mentions that half the funding comes from national research institutions and the other half from the EU's Seventh Programme. The right sidebar contains two sections: 'NEWSLETTER RUBRIKEN' with links for Berichte & Hintergründe, Wissenschaft & Forschung, and Politik; and 'NÄCHSTE KÜSTENTERMINE' listing the 'Symposium Küste 2025' in Hamburg (April 15-17) and the '7th International Coastal Atlas Network Workshop (ICAN 7)' (April 19-20).

**BONUS: sustainable ecosystem services projects starting**

01.04.2015

Eight research projects worth a total of EUR 17,3 million funded by BONUS, the joint Baltic Sea research and development programme, start their implementation in April. They will seek solutions as part of efforts to sustain the Baltic Sea ecosystem healthy while providing goods and services upon which the 85 million inhabitants living in the Baltic Sea catchment largely turn to for sea-dependent lifestyle and wellbeing.

As human activities have changed most ecosystems and continue to threaten the Earth's ability to support future generations, BONUS works to tackle this challenge in the Baltic Sea regional scale. It gathers the eight EU member states bordering the Baltic Sea to cooperate together and provide policymakers with the information they need to achieve greater sustainability in the region.

Half of the funding for the EUR 100 million programme comes from national research funding institutions around the Baltic Sea, the other half from the EU's Seventh Programme for research, technological development and

Climate Change in the Baltic Sea was the topic of a summerschool in Rostock about adaptation to climate change. The participants were young international scientists and students with diverse backgrounds from engineering, economics & tourism and natural sciences. They created 3 student films focusing coastal protection, coastal tourism, and nature conservation & fisheries. These student films are also shown
