

FINAL TASK FOR GROUP WORK

Students should proceed to work within the group on agreed Issue (favorable the one agreed in the beginning of the course):

1. Update Conceptual model.
2. Revise Issue identification part and update it.
3. List the human activities in the area/region
4. Map the stakeholders and with one short sentence categories these into which category of involvement you would expect them to be (“highly involved”, “attentives”, “browsers” or “general public”), also with one word what kind of influence they have/exert. Lobby group, etc.
5. Map the institutions relevant to the issue and which institute decides on what or which institute manages what.
6. Decide regards the stakeholder engagement strategy.
7. Discuss and select potential scenarios for the case studies;
8. Discuss how the Sustainability Indicators & Ecosystem Services and at what stage could be implemented

Students prepare the final presentation up to 10-15 min (PPT) (be sure that everyone from the group is involved in preparing and presenting it).
